

Batesville Casket Implements Mainsaver at 5th North American Plant

San Diego, CA – August 18, 2016: For over 20 years Batesville Casket, the world's largest manufacturer of metal and wood caskets, has used Mainsaver Enterprise Asset Management software to track corrective and preventive maintenance for their facilities and manufacturing equipment. In 2016, Batesville will be implementing Mainsaver at their state-of-the-art sawmill in Vicksburg, MS. Vicksburg joins long time Mainsaver users at other Batesville plants in Indiana, Mississippi and Tennessee.

Vicksburg processes lumber into quality components for Batesville's caskets. Critical processes involve seasoning and drying the wood for optimum performance and cutting the wood into precision sizes. In addition, sawdust fired boilers provide steam and heat for plant energy. Production, Engineering and Maintenance personnel will utilize the Mainsaver system.

Mainsaver will be providing project management and implementation services to upgrade all sites to the same platform utilizing Mainsaver 12.6 Classic and Mainsaver Connect modules to initiate and manage maintenance work. Mainsaver is also interfaced to the legacy financial system in place.

About Batesville

For the past 100 years, Batesville, a subsidiary of Hillenbrand Inc. (NYSE:HI), has been a leader in the death-care industry. The Batesville name represents a century-old tradition of quality and service. Our history of manufacturing excellence, product innovation, superior customer service and reliable delivery helped Batesville become the clear leader in the North American death care industry. Funeral professionals depend on Batesville to deliver the highest quality products, innovative technologies and proven solutions to support the evolving needs of families.

About Mainsaver

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
