

Northern Star Generation Services Selects Mainsaver

San Diego, CA –May 25, 2015: Mainsaver Software is pleased to announce it has been selected by Northern Star Generation Services to manage its Maintenance and Procurement Processes at its Nevada Cogeneration Associates #1 facility, (NCA1). The facility, located approximately 16 miles north of Las Vegas in the Garnet Valley area, has 85 MW of electrical generating capacity produced from 3 gas fired turbines. It supplies electricity to the Nevada area grid, as well as thermal energy to the adjacent Georgia Pacific Gypsum Wallboard plant. Northern Star will utilize Mainsaver to manage its Work Order processes as well as its Preventive Maintenance Program. It will also use Mainsaver's integrated Materials and Purchasing modules for facilitating plant procurement.

Northern Star Generation

Northern Star Generation Services, LLC provides asset management, operations, and maintenance services to its parent company, Northern Star Generation (NSG). NSG owns and operates 7 privately held power generation plants across the United States and anticipates growing the portfolio further as acquisition opportunities become available. The company is dedicated to providing reliable service to its customers, most of whom hold long term contracts with NSG for power generation capacity and energy production.

About Mainsaver

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
