AB Mauri North America to Implement Mainsaver

San Diego, CA – June 6, 2017: Mainsaver Software is pleased to announce the further expansion of its footprint in the Food & Beverage industry by the implementation of its CMMS application at the AB Mauri North America facility located in Cedar Rapids, Iowa. Earlier this year, Mauri acquired the 44,000 sq. ft. facility from Specialty Blending Co., a bread and sweet goods mix manufacturer. The facility features multiple blending lines, including two for whole-grain bread concentrates and a third for sweet good mixes.

At the core of the implementation, Mainsaver will replace an existing SAP, EAM system, and provide a comprehensive solution for managing Work Orders, Preventive Maintenance, Materials Inventory and Procurement. A data conversion of SAP historical data will be performed as part of the project, to provide an orderly transition from SAP to Mainsaver without loss of data continuity. In addition, Mainsaver will utilize its application programming interface, (API) to integrate to the current AB Mauri Financial System, providing a seamless solution for managing and procuring MRO materials.

About AB Mauri

With 55 plants, a presence in 34 countries and sales in over 90, AB Mauri is global in yeast and bakery ingredients, supporting and enabling the world's bakers, both small and large. The individual country businesses are dedicated to their local markets, both in terms of opportunity and demand and are backed with global expertise in bakery products, technologies and know-how. This unique combination of local knowledge and global expertise ensures AB Mauri bakery customers benefit from real awareness of local needs supported by a rapid response from industry experts.

About Mainsaver Software

Mainsaver offers a complete Enterprise Asset Management Solution with a robust Computerized Maintenance Management System (CMMS) at its core. As one of the industry's foremost established CMMS suppliers, Mainsaver provides solid software applications, trusted consulting services, and comprehensive customer support to its clients. Our solutions are designed to provide a maximum return on investment, whether installed as a standalone application, or as an "end to end" solution interfaced to any of today's popular ERP, MRP or financial packages.
